

Guidelines for full papers at IFSA 2014

The full papers for IFSA 2014 should be emailed to the workshop convenors by December 31st, 2013. The paper abstracts will be published in a book of abstracts, whereas the full papers will be published electronically at www.ifsa2014.de. In order to ease the editing work on the full papers, the IFSA 2014 team has issued a set of guidelines as well as electronic templates for full papers.

Full papers should include the following elements: Title, author name(s), author affiliations, keywords, abstract and of course the remaining manuscript. The body text of the paper should be supplied with headings which reflect the contents of the subsequent paragraphs. You should use the supplied Word-template for your papers, which you can download at www.ifsa2014.de. The template is supplied in Word 2007 format. The length of full papers should be maximum 8 pages, using the Word-template, including figures and tables. As a rule of thumb, the paper should not exceed 5.200 words (this applies for a paper where there is no graphics, and roughly 650 words per page, using the templates line spacing at 1.15).

Figures and images should be embedded in the word document. Please use graphics files in 300 dpi resolution or better. If this makes your word file too big, send the images separately and use captions in the text clearly indicating where which image has to go. Tables should preferably be native Word-tables and be embedded within the text, without exceeding the page margins.

Regarding references, you can use the IFSA Endnote-Style (*.ens) which formats the various layouts for different types of references. If you are not an Endnote-user, you can use the IFSA Reference Manager output style. Both you can find on the IFSA 2014 website.

For those of you, who are not using reference management software, you should conform to these conventions:

**11th European IFSA
symposium, April 1-4 2014
Berlin, Germany**
